

Glucosamine & Chondroitin

500mg Optiflex Glucosamine HCl plus 100mg Marine Chondroitin (90%)

What is Glucosamine & Chondroitin?

Each of these tablets contain 500mg of pure Optiflex Glucosamine HCl and 100mg marine-sourced chondroitin (90%).

Optiflex Glucosamine HCl

Healthspan's Optiflex Glucosamine HCl is the most advanced form of glucosamine available, providing 40% more pure glucosamine per gram than standard glucosamine sulphate 2KCl.

Unlike the more common glucosamine sulphate form (predominantly sourced from shellfish) Optiflex Glucosamine HCl is produced from natural plant sources using a special fermentation process making it completely shellfish-free, purer and more concentrated than the standard form.

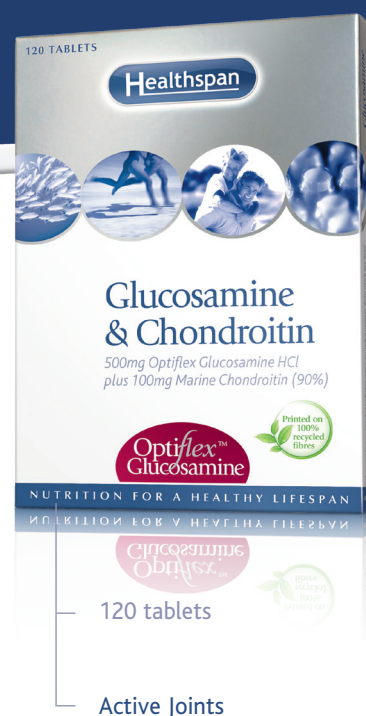

Marine Chondroitin

It is important to note that we only use 90% strength marine chondroitin, sourced exclusively from fish. Many companies use a lower strength and far cheaper 20% strength chondroitin in the bovine form.

Pharmaceutical quality

This Healthspan product is produced to pharmaceutical standards in government-approved facilities that operate to the highest manufacturing standards known as GMP (Good Manufacturing Practice). The purity of all ingredients is rigorously tested before manufacture.

recommended intake	Three tablets daily with food.  *
available as	120 tablets.
nutritional info	Typical values per tablet: Optiflex Glucosamine HCl 500mg Marine Chondroitin Sulphate 100mg
