

Super20 Probiotic

20 billion live 'friendly' bacteria

What is Super20 Probiotic?

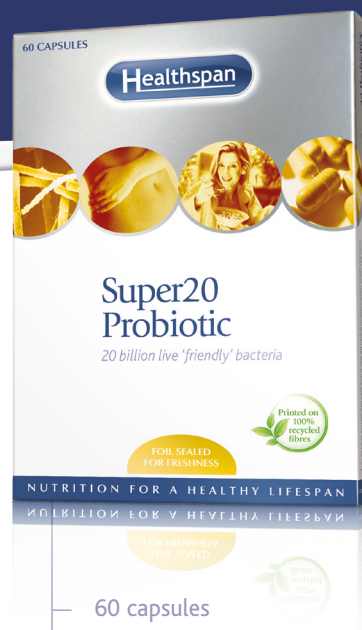

Literally meaning 'for life', probiotic is a term used to refer to the live 'friendly' bacteria that are found naturally in the gut.

Healthspan's Super20 Probiotic is one of the most advanced probiotic supplements available, providing an unprecedented level of 20 billion live 'friendly' bacteria per capsule. Carefully selected by our expert doctors and nutritionists, each capsule contains five well researched strains of probiotic bacteria including *Lactobacillus acidophilus* and *Bifidobacterium lactis*. These strains have been chosen as they support the protective intestinal microflora found naturally in the gut and crucially because they are resistant to the acidic conditions of the upper intestine.

Unlike expensive yoghurt drinks, our probiotic capsules contain no calories, have a long shelf life and don't need refrigerating, making them the most convenient way to increase your intake.

Pharmaceutical quality

This Healthspan product is produced to pharmaceutical standards in government-approved facilities that operate to the highest manufacturing standards known as GMP (Good Manufacturing Practice). The purity of all ingredients is rigorously tested before manufacture.
